

What you see

1. Choose the site or subzone from the list of sites/BGCs you've run; then choose the site series of interest
2. Model agreement on feasibility rating for each time period for each species. See legend (C)
3. Species ratings from the Chief Foresters Reference Guide
4. The base-line historic species environmental suitability rating
5. Recommended feasibility ranking of the species for establishment feasibility and feasibility of the species through the rotation based on model run settings
6. Ratio of model agreement on stable/improving trend (upper number) vsa declining/unsuitable trend

Options

- a. Toggle to change report type between detailed report or summary report
- b. Show only species that are feasible in any time period or show all species with any models predicting feasibility
- c. Colour legend for modelled feasibility. However over legend to see definitions
- d. Show the edatopic position for the site series selected in 1.
