

What you see

- 1. Choose the site or subzone from the list of sites/BGCs you've run; then choose the site series of interest
- 2. Model agreement on feasibility rating for each time period for each species. See legend (C)
- 3. Species ratings from the Chief Foresters Reference Guide
- 4. The base-line historic species environmental suitability rating
- 5. Recommended feasibility ranking of the species for establishment feasibility and feasibility of the species through the rotation based on model run settings
- 6. Ratio of model agreement on stable/improving trend (upper number) vsa declining/unsuitable trend

Options

- a. Toggle to change report type between detailed report or summary report
- b. Show only species that are feasible in any time period or show all species with any models predicting feasibility
- c. Colour legend for modelled feasibility. However over legend to see definitions
- d. Show the edatopic position for the site series selected in 1.
